December 23, 2015

It has been the mission of Sandtastik to educate and supply parents, professionals, and practitioners with 'the safest play sand in the world' for our children for many years.

Sandtastik is proud to support the tremendous effects of the #RedSandProject with a vibrant, eco-friendly, and safe sand.

## **Some facts about the Red Sand...**

### **Made from the feldspathic rock family**

A known source for producing a natural, non-toxic material completely void of carcinogens like crystalline silica, quartz, tremolite asbestos, and more. The sand also does not contain any nuts including peanuts, gluten, or wheat.

### **Colored using organic pigments and resins**

Encapsulating each grain with only organic ingredients and processed to sparkling perfection.

### **Tested annually with safety standards for children**

Safe for all ages. Operating in compliance with the following CPSC & LHAMA restrictions:

- i) Lead Content for Children's Non-metal Products #CPSC-CH-E1002-08 Certification
- ii) ASTM F963-11 Toy Substrate Material Certification
- iii) ASTM D-4236 Non-toxic Certification
- iv) ACMI 'AP' Approved Certification

## **Frequently asked questions...**

### **Is the sand safe for the environment?**

Yes. Sandtastik uses only natural and organic ingredients to manufacture our sand products: Sand (crushed feldspar rock) and color processing (organics pigments and resins).

### **Will the sand stain my skin or clothes?**

No. The sand will appear to 'rub off' and stick on skin and fabrics due to its extreme fineness. Grains will easily stick to surfaces with moisture, fabric, static, etc. Soap and water is encouraged for easy removal.
